# SUBJECT INDEX

Acenaphthylene
photodegradation of acenaphthylene polymers in dilute solutions, 113
Aggregation
aggregation of rose bengal ethyl ester induced by alkali metal cations in aqueous solution, 213
Algorithm
QYFIT: an algorithm for the simultaneous determination of a photochemical quantum yield and product spectrum, 83
Alkali metal cations
aggregation of role bengal ethyl ester induced by alkali metal cations in aqueous solution, 213
Anthracene dyes
photosensitized reduction of benzil by heteroatom-containing anthracene dyes, 203
Aromatic amines
the reductive quenching of excited $Ru(bpy)^{32+}$ by aromatic amines: solvent and structural effects, 143
5-Arylthiophene-2-carboxylic
photochemical behaviour of halogenothiophenes: synthesis of 5-arylthiophene-2-carboxylic esters, 191

Benzil
photosensitized reduction of benzil by heteroatom-containing anthracene dyes, 203
Benzophenone ketyl radical
fluorescence of the benzophenone ketyl radical: solvent effects, 155
BrCN
laser measurements of the quenching and reaction of CN radicals with BrCN and ClCN, 41

$C_2$ molecule
kinetics of $C_2(C\ ^1\pi_g)$ photofragmentation in collisions with helium, xenon and oxygen, 31
Carbonates
formation and isolation of uranium(V) in the photochemical reduction of uranyl ion in aqueous carbonate medium, 181
Chelating ligands
mixed-ligand complexes of platinum(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for the generation of $^1O_2$, 287
Cinnamates
the singlet states of methyl cinnamate and methyl indenoate, 173
ClCN
laser measurements of the quenching and reaction of CN radicals with BrCN and ClCN, 41
CN radicals
laser measurements of the quenching and reaction of CN radicals with BrCN and ClCN, 41
Counter-ions
multiplicity selective photoisomerization of 5,5-diphenyl-1,3-hexadiene in aqueous micellar solutions containing heavy counter-ions, 345
Cyclic enethiones
photophysics of the second excited singlet states of cyclic enethiones, 277

*N,N'*-Dioxide
an ESR study of photochemical reaction of heterocyclic *N,N'*-dioxide, 327
Diphenyl derivatives
excimer emission of diphenyl derivatives in the pulse radiolysis of 3-methylpentane solutions at low temperature, 319
multiplicity selective photoisomerization of 5,5-diphenyl-1,3-hexadiene in aqueous micellar solutions containing heavy counter-ions, 345

ESR
an ESR study of photochemical reaction of heterocyclic *N,N'*-dioxide, 327

© Elsevier Sequoia/Printed in The Netherlands

Esters
aggregation of rose bengal ethyl ester induced by alkali metal cations in aqueous solution, 213
Ethanethiol
photolysis of and reactions of hydrogen atoms with ethanethiol, 47
Excimer emission
excimer emission of diphenyl derivatives in the pulse radiolysis of 3-methylpentane solutions at low temperature, 319

Finite sink approximation
significance of the static fluorescence quenching limit in the finite sink approximation, 131
Flash photolysis
flash photolysis of molecules implicated in 9-nitroanthracene photochemistry, 166

Halogenothiophenes
photochemical behaviour of halogenothiophenes: synthesis of 5-arylthiophene-2-carboxylic esters, 191
Hydrogen abstraction
laser flash photolysis studies of the magnetic field effects on the hydrogen abstraction reaction of 2-naphthylphenylcarbene in micellar solution, 269
Hydrogen atoms
photolysis of and reactions of hydrogen atoms with ethanethiol, 47

Indenoates
the singlet states of methyl cinnamate and methyl indenoate, 173
Ion-pairs
photoinitiation of polymerization of methyl methacrylate by the hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-*n*-butylamine ion-pair complex, 353
Iron complexes
micellar effects on photochemical redox reactions of $Fe(bipy)_2(CN)_2$, 91

Laser flash photolysis
laser flash photolysis studies of the magnetic field effects on the hydrogen abstraction reaction of 2-nahpthylphenylcarbene in micellar solution, 269
Lipid membrane
*trans*-4-dimethylamino-4′-(1-oxobutyl)stilbene: a new fluorescent probe of the bilayer lipid membrane, 299
Luminescence
luminescence and photochemistry of 9-nitroanthracene at 4.2 K, 309

Magnetic field effects
laser flash photolysis studies of the magnetic field effects on the hydrogen abstraction reaction of 2-naphthylphenylcarbene in micellar solution, 269
Methyl methacrylate
photoinitiation of polymerization of methyl methacrylate by the hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-*n*-butylamine ion-pair complex, 353
thioxanthone photopolymers I: a kinetic study of methyl methacrylate polymerization using 2-benzyloxy thioxanthone, free and polymer bound, as photoinitiator, 365
3-Methylpentane
excimer emission of diphenyl derivatives in the pulse radiolysis of 3-methylpentane solutions at low temperature, 319
Micellar media
excited state proton transfer reaction in micellar media, 249
Micelles
fluorescence enhancement of *p*-toluidino naphthalenesulphotnate in a micellar environment, 97
laser flash photolysis studies of the magnetic field effects on the hydrogen abstraction reaction of 2-naphthylphenylcarbene in micellar solution, 269
micellar effects on photochemical redox reactions of $Fe(bipy)_2(CN)_2$, 91
multiplicity selective photoisomerization of 5,5-diphenyl-1,3-hexadiene in aqueous micellar solutions containing heavy counter-ions, 345
Mixed-ligand complexes
mixed-ligand complexes of platinum-

(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for the generation of $^1O_2$, 287
Multifunctional diacrylates
photo-oxidative stability and photo-yellowing of electron-beam- and UV-cured multifunctional amine-terminated diacrylates: a monomer/model amine study, 223

2-Naphthylphenylcarbene
laser flash photolysis studies of the magnetic field effects on the hydrogen abstraction reaction of 2-naphthylphenylcarbene in micellar solution, 269
9-Nitroanthracene
flash photolysis of molecules implicated in 9-nitroanthracene photochemistry, 166
luminescence and photochemistry of 9-nitroanthracene at 4.2 K, 309

Oxygen
mixed-ligand complexes of platinum-(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for the generation of $^1O_2$, 287

Palladium
mixed-ligand complexes of platinum-(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for the generation of $^1O_2$, 287
Photo-oxidative stability
photo-oxidative stability and photo-yellowing of electron-beam- and UV-cured multifunctional amine-terminated diacrylates: a monomer/model amine study, 223
Photodegradation
photodegradation of acenaphthylene polymers in dilute solutions, 113
photodegradation of surfactants. V. Photocatalytic degradation of surfactants in the presence of semiconductor particles by solar exposure, 103
Photofragmentation
kinetics of $C_2(C\ ^1\pi_g)$ photofragmentation in collisions with helium, xenon and oxygen, 31
Photoinitiation
photoinitiation of polymerization of methyl methacrylate by the hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-*n*-butylamine ion-pair complex, 353
Photoinitiators
thioxanthone photopolymers I: a kinetic study of methyl methacrylate polymerization using 2-benzyloxy thioxanthone, free and polymer bound, as photoinitiator, 365
Photoisomerization
multiplicity selective photoisomerization of 5,5-diphenyl-1,3-hexadiene in aqueous micellar solutions containing heavy counter-ions, 345
Photoluminescence
photoluminescence studies of the uranyl carbonate system, 65
Photolysis
photolysis of and reactions of hydrogen atoms with ethanethiol, 47
quantum yields in the photolysis of trichlorobenzenes in cyclohexane, 2-propanol and methanol, 337
Photosensitized reduction
photosensitized reduction of benzil by heteroatom-containing anthracene dyes, 203
Photosensitizers
mixed-ligand complexes of platinum-(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for the generation of $^1O_2$, 287
Photoyellowing
photo-oxidative stability and photo-yellowing of electron-beam- and UV-cured multifunctional amine-terminated diacrylates: a monomer/model amine study, 223
Platinum
mixed-ligand complexes of platinum-(II) and palladium(II) with 1,10-phenanthroline and aromatic chelating ligands containing OH or SH groups as photosensitizers for

the generation of $^1O_2$, 287
Polymerization
mechanistic and kinetic studies of the polymerization of styrene photoinitiated by *p*-acetyl benzylidene triphenylarsonium ylide, 379
photoinitiation of polymerization of methyl methacrylate by the hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-*n*-butylamine ion-pair complex, 353
thioxanthone photopolymers I: a kinetic study of methyl methacrylate polymerization using 2-benzyloxy thioxanthone, free and polymer bound, as photoinitiator, 365
Polymers
photodegradation of acenaphthylene polymers in dilute solutions, 113
Probe
*trans*-4-dimethylamino-4′-(1-oxobutyl)stilbene: a new fluorescent probe of the bilayer lipid membrane, 299
Proton transfer
excited state proton transfer reaction in micellar media, 249
Pulse radiolysis
excimer emission of diphenyl derivatives in the pulse radiolysis of 3-methylpentane solutions at low temperature, 319

Quenching
a comparison of $Xe(^3P_1)$ and $Xe(^3P_2)$ quenching reactions, 259
QYFIT
QYFIT: an algorithm for the simultaneous determination of a photochemical quantum yield and product spectrum, 83

Redox reactions
micellar effects on photochemical redox reactions of $Fe(bipy)_2(CN)_2$, 91
Reduction
formation and isolation of uranium(V) in the photochemical reduction of uranyl ion in aqueous carbonate medium, 181
Reductive quenching
the reductive quenching of excited $Ru(bpy)_3^{2+}$ by aromatic amines: solvent and structural effects, 143
Rose bengal
aggregation of rose bengal ethyl ester induced by alkali metal cations in aqueous solution, 213
rose bengal (Review), 1
Ruthenium
the reductive quenching of excited $Ru(bpy)_3^{2+}$ by aromatic amines: solvent and structural effects, 143

Semiconductor particles
photodegradation of surfactants. V. Photocatalytic degradation of surfactants in the presence of semiconductor particles by solar exposure, 103
Solar exposure
photodegradation of surfactants. V. Photocatalytic degradation of surfactants in the presence of semiconductor particles by solar exposure, 103
Solvent effects
fluorescence of the benzophenone ketyl radical: solvent effects, 155
the reductive quenching of excited $Ru(bpy)_3^{2+}$ by aromatic amines: solvent and structural effects, 143
Static fluorescence quenching
significance of the static fluorescence quenching limit in the finite sink approximation, 131
Stilbene
*trans*-4-dimethylamino-4′-(1-oxobutyl)stilbene: a new fluorescent probe of the bilayer lipid membrane, 299
Structural effects
the reductive quenching of excited $Ru(bpy)_3^{2+}$ by aromatic amines: solvent and structural effects, 143
Styrene
mechanistic and kinetic studies of the polymerization of styrene photoinitiated by *p*-acetyl benzylidene triphenylarsonium ylide, 379
Surfactants
photodegradation of surfactants. V. Photocatalytic degradation of surfactants in the presence of semiconductor particles by solar exposure, 103

Thioxanthone
thioxanthone photopolymers I: a kinetic study of methyl methacrylate polymerization using 2-benzyloxy thioxanthone, free and polymer bound, as photoinitiator, 365
*p*-Toluidino naphthalenesulphonate
fluorescence enhancement of *p*-toluidino naphthalenesulphonate in a micellar environment, 97
Trichlorobenzenes
quantum yields in the photolysis of trichlorobenzenes in cyclohexane, 2-propanol and methanol, 337

Uranium
formation and isolation of uranium(V) in the photochemical reduction of uranyl ion in aqueous carbonate medium, 181
Uranyl carbonate
photoluminescence studies of the uranyl carbonate system, 65

Vanadium
photoinitiation of polymerization of methyl methacrylate by the hydroxo-oxobis(8-quinolyloxo)-vanadium(V)-*n*-butylamine ion-pair complex, 353

Xenon
a comparison of $Xe(^3P_1)$ and $Xe(^3P_2)$ quenching reactions, 259

Ylide
mechanistic and kinetic studies of the polymerization of styrene photo-initiated by *p*-acetyl benzylidene triphenylarsonium ylide, 379
